Shaping the energy transition

For over 35 years, HUSUM WIND has been accompanying the wind industry in practical relevance, product innovations and networking. It has become the most important trade fair for renewable energies for the German-speaking market. Expert forums, networking events and the job fair WINDCareer round off the trade fair.

Join us from 16–19 September 2025 when the industry meets in Husum.

husumwind.com

Innovative power from all sectors

- › Plant manufacturing and production
- › Planning, logistics and operation
- › Service and maintenance
- › Green hydrogen
- › Sector coupling
- › Recycling and reuse
- › Digitalisation, Cyber Security, Artificial Intelligence
- › Energy supply, grid operation and storage
- › Financing, insurance, consulting
- › Research and development

€ 135,-/sqm*

* plus additional costs + VAT

Save time on planning

- › Stand space in the confirmed size
- › Stand construction incl. lockable cabin, lighting, labelled panels
- › Table + 3 chairs, 1x Information counter
- › Ribbed carpet
- › Power connection (3kW)
- › Media package
- › On arrival and daily cleaning
- › AUMA fee, waste disposal, and energy cost allocation flat rate
- › Parking and exhibitor passes (2 each)

Shell scheme 9-24 sqm

› from € 475,-

Price per sqm

Digital+ Area

Shaping the digital transformation of the wind industry

The wind industry is undergoing a digital transformation. With the innovative **Digital+ Area** at HUSUM WIND 2025, we are creating a platform for the first time where the latest technological developments from the digital sector can be networked with renewable energies. Digitalisation, artificial intelligence and the equally relevant and pressing issue of cyber security will be key topics, and in addition to panel discussions, bundled lectures, workshops, regulars' tables and guided tours, well-known figures from politics, industry and journalism will discuss the latest trends and developments in the central forum.

Take advantage of this unique opportunity to position your brand prominently, make valuable contacts and win new customers. Position yourself from day one in this forward-looking area of the wind industry!

Green hydrogen

Energy source of the future

Northern Germany is a role model for a green hydrogen economy, with numerous pilot projects underway. Due to its central importance for the future, green hydrogen will once again be an integral part and focus of HUSUM WIND 2025.

With a dedicated **Hydrogen Area** in Hall 2 and an accompanying forum programme, we have been creating a platform and offering first-class B2B networking opportunities for years.

WINDCareer

The job fair at the must-attend event of the year

There has never been a greater demand for skilled workers in the wind and renewable energy industry. Due to the strong growth of the industry, companies are looking for qualified young talent from a wide range of disciplines more than ever before.

WINDCareer 2025 will take place on two days. Take the opportunity to present your company not only to specialists, but also to career changers and young professionals.

Expertise from the industry

A top-class lecture programme will take place in our specialist forums on all four days of the trade fair. Experts from the industry and wind associations will organise lectures, conferences, panel discussions and forums. Register now and join us as a speaker.
