

PRESS RELEASE

HUSUM Wind takes place from 14-17 September as a presence trade fair

All OEMs have confirmed participation / Industry presents high-performance technology and innovations / New hall concept / Ticket shop online as of 17 June

HUSUM | 17 June 2021. The decision has been made: HUSUM Wind 2021 will take place as scheduled from 14-17 September as a presence trade fair. For the first time since the outbreak of the pandemic in spring 2020, it will be possible to host an important trade fair for the wind and renewable energy sector as an on-site event.

"We are delighted to once again be able to offer the industry a real trade fair experience with personal contacts in September, while complying with the applicable hygiene regulations," said Klaus Liermann, CEO of Messe Husum & Congress, after the supervisory board meeting this week. Around 90 percent of the exhibitors, including all OEMs, who had optioned stand space by June confirmed their participation after the publication of the concept for HUSUM Wind 2021. According to the current planning status, the industry will then have the opportunity to present technical innovations and new products live and on site for the first time in one and a half years.

There will be an innovation in the hall planning: Halls 1 and 2, which were planned at cross positions, will be combined in a new large hall directly at the main entrance to the fair which is rotated by 90 degrees. This will ensure that visitor flows are efficiently guided along the full length of the hall in a one-way system.

From 17 June, the online ticket shop will be opened on the fair portal. Due to the pandemic, only online tickets will be available. There will be admission slots with ticket quotas for the individual days of the fair in order monitor the flow of visitors.

About HUSUM Wind - We take wind a step further

The B2B platform for the wind industry: at this year's HUSUM Wind, over 300 exhibitors present new products, cutting-edge technology and innovative onshore and offshore solutions for wind energy in tomorrow's renewable energy system. For thirty years, the dynamic trade fair has accompanied the wind industry in transition and offers practical relevance, product innovations and networking. From 14-17 September 2021, everything in Husum will revolve around wind energy and the key topic of green hydrogen. #husumwind
